

Explanatory note of how overall SA RAG rating has been included in site assessment

When assessing the sites, the Council relied on the individual RAG ratings for each of the SA assessment criteria to inform the assessment of each site, as well as the suggested mitigations. These were taken from Table 6.1 and Appendices C1 and C2 of the 2022 Sustainability Appraisal (SD/4) at the time of plan preparation. Table 6.1 remains the same in EXAM 21 and the assessment of the relevant sites have transferred from Appendices C1 and C2 (SD/4c and SD/4d) to Appendix B (EXAM 21B) for accuracy.

The overall RAG rating was not the determinative factor as to whether a site has been proposed for allocation in the submission Local Plan. Having reviewed each instance where there has been an inconsistency in the overall RAG rating the Council is satisfied that in each instance the outcome would have been the same.

Therefore, the Council is proposing to use Table 6.1 (EXAM 21) and Appendix B (EXAM 21B) throughout the course of the Examination.

Policy SL02 – Former Western Park Golf Course (Site 702) – Explanatory note on appraisal of the policy and site in the Sustainability Appraisal

Policy SL02 was assessed in SA Appendix D. Detailed appraisal of Local Plan policies (September 2022) (SD/4e), and this is accurately reflected in Tables 1.1 and 7.1 of the main SA Report (SD/4). SD/4e quotes the policy text on pp. 6-7, however, the quoted text contains minor errors regarding figures. These errors have not affected the appraisal of the site.

Appraisal of Site 702 was incorrectly excluded from SA Appendix B. Detailed appraisal of Local Plan sites (September 2022) (SD/4b) and was instead included in SA Appendix C2. Detailed appraisal of sites not in the Local Plan from site 643 (September 2022) (SD/4d). The appraisal of the site is correct, despite being in the wrong appendix. This has been corrected in EXAM 21B. Site 702 appraisal identifies 7 red constraints which are:

- Distance to green wedge
- Distance to Local Wildlife Site
- Biodiversity
- Archaeology
- Distance to water body
- Previously developed land

- Distance to train station

Mitigations for the site have been addressed in Document SD/18.

In SD/4, Site 702 was incorrectly included in Table 6.2 as a site removed between the pre-submission and submission Local Plan. This is explained in EXAM 20 and is corrected in Table 6.2 in EXAM 21. Site 702 is incorrectly excluded from Table 6.4 (Reasons for including seemingly unsustainable sites in the Local Plan) in SD/4 but has been included in Table 6.4 in EXAM 21.
